for the additional costs of operating more expensive washes or to encourage residents to opt for cold-water only and energy-saving washes. Top load washer aficionados can now have Energy Star alternatives on a small top load washer as well as the front load washers. The Quantum line equipment comes coin or card ready and has user-friendly electronic controls and displays.

Speed Queen's new Quantum line is expected by late spring. For more information, please go to www.hiriselaundry.com and click on the Speed Queen link in "Our Services."

The Quantum Card Line-Up
(From left): Top load washer, stack dryer, & single load dryer.

The Quantum Card Horizon Line-Up
(From left): 18-pound front load washer, washer/dryer combo, & single load dryer.

What's that mean?

In the first of a series, laundr-*e*-news uncovers the mystery behind care labels…

	Machine Wash Cold
	Machine Wash Hot
	Tumble Dry Low Heat
	Tumble Dry Gentle Cycle Low Heat
	Do Not Wash
	Do Not Tumble Dry

Look out for our new signs & clocks in your laundry room -- our way of keeping your residents informed!

A new installation

At this Rego Park Co-op, Hi-Rise installed new debit card activated Energy Star washers on bases with energy-efficient dryers. The residents will be able to add value to their cards with either a credit or bank card. The tile floor was replaced, all of the surfaces were painted, and convenience furniture was supplied. In addition to these physical changes, the Co-op opted to use the Hi-Rise rental/service agreement where a fixed amount is paid for the use of the equipment and service, but all of the income is paid directly to the Co-op. The processing of the credit and bank card transactions is done by Hi-Rise through its third party processor with money transferred by ACH wire to insure the integrity of the money control. Monthly statements are forwarded by e-mail and hard copy.
